

سلام.من احمدنوروزي هستم. ميخوام براتون كل كدها

ورمزهاي مخفي موبايل ها روبگم.اين كدها(رمزها) ١٠٠%

صحيح هستن،من خودم اينارو امتحان كردم،نه همشون رو فقط روي گوشسيهايي مثل:نوكيا،سامسونگ،سوني اريكسون امتحان كردم،جواب داد،حالا شما هم ميتونيد امتحان كنيد.... .

(اما يه چيزي ناگفته نماند،من براي اين كدها ورمزها كلي هزينه وكلي سختي كشيدم،حتي براي نوشتن اين كدها ورمزها،اميدوارم كه لذت كافي را ببريد)

بسمه تعالي

احمدنوروزي ahmadnoroozi1372.blogfa.com

Смартфоны:

***#06#** - IMEI смартфона
(IMEI номер - состоит из 15 цифр,
он уникален и есть у каждого телефона).
Этот номер должен совпадать с номером на коробке.

***#0000#** - номер прошивки

Загрузка в Safe Mode:
1. Выключить телефон
2. Нажать "КАРАНДАШ" (и НЕ отпускать)
3. Нажать кнопку включения
4. Держать "КАРАНДАШ" до ПОЛНОЙ загрузки!!!

***#7780#** - восстановление исходных (рабочих) настроек смарта
***#7370#** - сбросить смарт в заводские настройки
(т.е. удаляется весь софт, котакты, календарь и пр
- смарт становится чистым!)

ВНИМАНИЕ! Для использования последних двух кодов

надо будет ввести код блокировки телефона (по умо 'ebчанию **12345**)!

***#2820#** - уникальный адрес Bluetoth-модуля вашего девайса
(может понадобиться другим устройствам,
которые не умеют отображать имена).

***#7370925538#** - очиска "Бумажника"
(для **Nokia 6600** и выше - в которых есть "Бумажник").
***3370#** (телефон должен перегрузиться)
улучшает качество звука (использование EFR),
но уменьшает время работы батареи.

#3370# - сбрасывает качество звука к нормальному (отменяет код ***3370#**).
EFR CODEC (Enhanced Full Rate)

Данная функция при ее включении, по идее,
должна значительно улучшить качество передаваемой речи,
но, к сожалению, она должна поддерживаться оператором сотовой связи.
При ее работе слегка повышается энергопотребление телефона
в режиме разговора (около 5%). Насколько известно,
ни один из российских сотовых операторов не поддерживает эту функцию.
Принцип основан на другом алгоритме сжатия речи (ACELP)
и занимает более широкую полосу частот.

***4720#** - включить Half Rate Codec (HFR)
#4720# - отключить Half Rate Codec (HFR)

HR CODEC (Half Rate)
Значительно ухудшает качество речи,
но экономит аккумулятор где-то на 30%.
Опять же, должен поддерживаться сотовым оператором.

7. Press END button to complete programming

Handspring TREO:
1. Open the flip and press the PHONEBOOK button one time to display the dial pad
2. Enter ## and the OTKSL using the numbers on the Dial Pad
3. Press the handset button shown in the diagram above
4. At the Activations screen enter the MIN
in the phone number field using the numbers on the device keyboard
5. Put a check in the Enabl Number Portability box and type the MSID in the MSIN field
6. Press OK
7. The device will display the network search pop-up and return to the Phonebook display

Hitachi P300:
1. Enter ## and the 6 digit OTKSL
2. Press the Options soft key and then scroll to Save Phone #.
Press the OK soft key.
3. At the NAM display scroll to EDIT and press the OK soft key
4. Display will read NAM and MDN will be highlighted. Press the OK soft key.
5. At the MDN display enter the 10 digit MIN and press the SAVE soft key.
6. At the Save prompt press the OK soft key.
The next display will show several options that should not edited.
7. Press the EXIT soft key and the device will power cycle.
8. Programming is complete.

Kyosera:
Kyocera 2345 1135
1. Press 111111 (#1 key 6 times)
2. Option will be highlighted
3. Press OK
4. Scroll down to Programming
5. The service programming dialog will appear Enter Security Code.
6. Enter the 6 digit OTSKL (code will show as asterisks on screen)
7. Service Options will appear
8. Scroll down to the BASIC NAM1 Info
9. Press OK
10. Select the Phone Number by pressing the OK key
11. Using the keypad enter the 10 digit MIN
12. Press OK
13. Press END to complete the programming

Kyocera 6035:
1. Press 1 six times (111111) and select OPTIONS
2. Select PROGRAMMING
3. Open flip
4. Tap the OTKSL on keypad on the screen. Tap OK

5. Tap on the PHONE NUMBER field. Enter MIN.
6. Leave A-KEY blank
7. Enter HOME SID (4654)
8. Tap SAVE & EXIT
9. Tap YES
10. Phone will be in OFF MODE Close flip.

Kyocera 3035:
1. Press 111111 (the #1 key six times)
2. Options will be highlighted
3. Press in the navigation key
(Navigation key is the button located between the TALK & END key)
4. Scroll to PROGRAMMING using the Navigation key
5. Select PROGRAMMING by pressing in the Navigation key
6. Enter the six digit OTKSL and press in the navigation key
7. SERVICE OPTIONS will appear
8. Scroll down to the Basic NAM1 info
9. Press in the navigation key
10. Clear any numbers that may appear using the "clear" key
(arrow key located directly below the navigation key)
11. Select the PHONE NUMBER by pressing in the navigation key
12. Enter the 10 digit MIN select OK by pressing in the navigation key
13. Press END. Programming is complete.

Kyocera 2255:
1. Press the 1 key six times (111111) "Option will be highlighted
2. Press OK
3. Scroll down to "Programming" and press "OK"
4. Enter OTKSL and press the navigation key
5. "Service Options" will appear scroll down to the "Basic NAM1 Info"
6. Press OK
7. Select Phone Number by pressing OK
8. Enter MIN and press OK again
9. Scroll to Home SID and press OK
10. Enter SID (4654) and press OK
11. Press END. Programming is complete.

QCP 2035:
1. Press 1 six times (111111)
2. Press u key to select OPTIONS
3. Highlight PROGRAMMING and press u key
4. Enter OTKSL
5. ESN will appear press left arrow key to select OK
6. Enter MIN and press 3 key
7. Press 3 key again to exit - Programming is complete

Sanyo:
Sanyo 4000 4500 4700 5000 6000:
1. Press ##
2. Enter the OTKSL

3. Scroll to SAVE and press OK
4. ESN will be displayed - press OK
5. Enter 10 digit MIN and press OK
6. Enter SID (4654) and press OK
7. Press OK twice
8. Programming is complete

Sanyo 5150 5300 and 6400:

1. Enter ## followed by the OTKSL
2. Press MENU SAVE PHONE #
3. Press Ok
4. SVC Programming ill be displayed.
Scroll and highlight Mobile Number. Press OK
5. Press OK again
6. ESN will be displayed. Press OK
7. Mobile Number will be displayed enter the 10 digit MIN press OK
8. Press OK 4 times
9. Phone will power cycle
10. Programming is complete

Sanyo 6000:

1. Press ##
2. Enter OTKSL
3. Press MENU Key and scroll to SAVE PHONE # and press OK
4. ESN will be displayed press OK
5. Enter MIN and press OK
6. Enter SID and press OK
7. Press OK twice more
8. Programming is complete

Sanyo 4900:

1. Enter ## followed by the 6 digit OTKSL
2. Press the MENU/OK key and scroll and highlight SAVE PHONE #
3. Press MENU/OK
4. Scroll and highlight MOBILE NUMBER press OK
5. At the ESN display press OK
6. In the MOBILE NUMBER screen enter your MIN and press OK 4 times
7. At the service program menu scroll to exit and press the MENU/OK key.
8. Programming is complete

Sanyo 6200:

1. Enter ##
2. Enter OTKSL
3. Press the MENU key and scroll to highlight SAVE PHONE #
4. Press OK
5. Scroll and highlight MOBILE NUMBER
6. Press OK twice
7. Scroll and highlight EXIT
8. Press OK
9. Phone will power cycle

10. Programming is complete

Toshiba 2032P:

1. Slide the Radio Standby Switch on the left side of the device to the upper side (ON) to activate the phone function.
This is the switch with the phone icon over it

2. After power up is completed use the stylus to tap on the ADMIN pull up menu at the bottom of the screen and select ACTIVATION WIZARD.
If your device has not yet been activated the ACTIVATION WIZARD will automatically start when you turn on the radio in your device.

3. Tap NEXT 3 times.
If the device has been previously activated it will require only 2 presses.
4. On the fourth screen enter the 6 digit OTKSL using keyboard
5. Enter the MIN in both entery fields then tap NEXT
6. Wait for the device to initialize and display "ready to connect"
7. To initiate IOTA tap the word ADMIN at the bottom of the display and then Data Provisioning
8. Programming is complete

Как попасть в меню блокировок, увы, не знаю - не нашел.
Может вообще заблокировано это меню, хотя кто ж знает.

Nec Service Codes

***#06#**	IMEI
